IDENTIFIERS	*Texas

ABSTRACT

Procedures and statewide results are presented from a survey of a sample of May 1980 graduates from selected public senior colleges in Texas. The nine institutions involved in the study included North Texas State University, Southwest Texas State University, Texas A&I University, Texas Tech University, Texas Women's University, the University of Houston Central Campus and the University of Texas at El Paso. Figures include graduates by institutions, sample survey questionnaires, and responses to the survey. The list of tables includes: total population and responses to Question "A"; annual salary by program; salary information by program; occupation to program match; location of employment; and related occupations. Appendices include the format for submission of graduate lists and the letter sent to graduates with the survey. The tabulated results of the survey are listed in Tables 1 through 6. Each table has a section for baccalaureate degrees and a section for graduate degrees. The results include: two areas, Houston and Dallas-Fort Worth, account for about 50 percent of all jobs reported by graduates; 89 percent of all baccalaureate degree respondents and 82.4 percent of those with graduate degrees took jobs in Texas; and 62.2 percent of all baccalaureate level respondents actively entered the job market following graduation. FOLLOW-UP SURVEY OF MAY 1980 GRADUATES FROM SELECTED SENIOR COLLEGES IN TEXAS

INTRODUCTION

During the summer of 1980 the Coordinating Board, Texas College and University System conducted a follow-up survey of a selected sample of May 1980 graduates. Nine public senior colleges and universities participated. This report describes the survey methods, procedures and statewide results. Survey results for each of the nine institutions were also tabulated and provided directly to the institution concerned.

BACKGROUND

The Office of Postsecondary Educational Planning conducted the senior college follow-up survey to enhance the validity of information contained in the publication, Postsecondary Educational Supply and Occupational Demand in Texas. The objective of the survey was to obtain information about the percentages of graduates, by discipline, who entered the Texas job market following completion of their course of study. Occupational information from those graduates who found employment was also sought. Students who found employment were asked to identify whether their job was directly, closely, generally, or unrelated to their educational training and provide information concerning annual salary, location of employment and occupation title. The intent of the survey was to obtain job market data, not to make judgements regarding employment opportunities associated with a particular degree program area.

Nine senior institutions that had previously expressed an interest in a graduate follow-up project were asked to participate in the survey. After reviewing the program offerings and expected number of graduates from each institution and discussing the project with institutional representatives it was decided to survey all May 1980 graduates from North Texas State University, Southwest Texas State University, Texas A&I University, Texas Tech University, Texas Woman's University, the University of Houston Central Campus and the University of Texas at El Paso. Graduates in certain disciplines were selected for survey from the University of Texas at Austin and Texas A&M University. Collectively these universities provide coverage of approximately one-third of the statewide total of the degrees awarded in each major program. This sample also provides representation from all geographic regions of the state and reflects the varying institutional missions and ethnic mixes of Texas universities.

DATA COLLECTION AND ANALYSIS

In April 1980, a letter was sent to participating institutions requesting that they provide the Coordinating Board with the name, permanent address, academic major, and level of degree for the graduates of May 1980. This information was acceptable either on magnetic tape or on roster format. The format description for the magnetic tape submission is included at Appendix A. Using these data and automatic data processing it was possible to print a listing of graduates by academic program by degree level for each institution and assign a unique code number to each graduate.

Lists of graduates supplied by the institutions were reviewed, and names with incomplete data or with addresses outside the United States were eliminated. Figure 1 provides information on the number of graduates listed and surveyed for each institution.

FIGURE 1

Institution	Number of Graduates Listed	Number Surveyed
North Texas State University	1,218	1,173
Southwest Texas State University	1,287	1,239
Texas A&I University	341	319
Texas A&M University	1,908	1,808
Texas Tech University	2,064	1,937
Texas Woman's University	684	645
University of Houston	2,404	2,237
University of Texas-Austin	2,680	2,582
University of Texas-El Paso	782	698
ALL INSTITUTIONS - TOTAL	13,368	12,638

The questionnaire was printed on a postcard. On the reverse side of the card a return address label was affixed. The individual control number was placed in the lower right hand corner of the label to identify respondents by institution, degree program and degree level. The respondent's name was not included on the postcard. A sample of the front and back of the postcard survey form is shown at Figure 2. The Office of Postsecondary Educational Planning mailed an envelope containing the survey postcard and a letter (See Appendix B) to each graduate to be surveyed.

The initial deadline for return of the survey was July 1, 1980. One week after this date a second set of computer generated labels was prepared for those graduates who had not responded to the first survey request. A second letter and postcard were sent to each non-respondent. The deadline for the second round submission was August 1, 1980. The statewide response to each mail out is shown in Figure 3.

FIGURE 2

PLEASE RESPOND TO THE FOLLOWING AND RETURN IT TO THE ADDRESSEE NO LATER THAN AUGUST 1, 1980

A. Check the appropriate answer:

1. ______ I was employed in my present position while I completed my education.
2. ______ I have found employment.
3. ______ I am seeking employment.
4. ______ I do not intend to seek employment at this time; I am continuing my education.
5. ______ I do not intend to seek employment at this time for some other reason.

B. If you are employed, please check the appropriate answer:
The job I obtained is

6. ______ directly related to the educational training I received.
7. ______ closely related to the educational training I received.
8. ______ generally related to the educational training I received.
9. ______ not related to the educational training I received.

C. If you are employed, please supply the following information:

Job Title ______________________________

City/State ______________________________

Annual Salary ______________________________

THANK YOU FOR COMPLETING THE QUESTIONNAIRE.

FIGURE 3

	First Mail Out	Second Mail Out	Total Both Mail Outs
Number Surveyed	12,638	6,478	12,638
Number Responses	6,160	3,091	9,251
Response Rate	48.74%	47.72%	73.20%

Note: An additional 160 cards were received after the data had been processed. These are not included in the above totals and are not reflected in the data summaries.

Upon receipt of the completed survey cards, each was individually edited before being sent to data processing for entry into the data base. Job titles were coded to correspond to U.S. Bureau of the Census Occupational Classification System. Place of employment (city/state) was coded to correspond to one of the Texas counties (001 through 254) or given a code of 255 if outside the State of Texas. Annual salaries were checked to insure that they were in fact annual and, if monthly or hourly, converted to annual. If the respondent had checked Item A, 1--which indicated that he or she was previously employed or if place of employment was outside the state, annual salary data was deleted. Therefore, annual salary data was recorded only for graduates who found employment in Texas after completing the program of study.

SURVEY RESULTS

The tabulated results of the survey are listed in Tables 1 through 6. Each table has a section for baccalaureate degrees and a section for graduate degrees.

TABLE 1: This table summarizes the responses to question "A" by program area and degree level. The column with the heading "TOTAL POP" indicates the total number of questionnaires sent out for each program, the "TOTAL SURVEY RESPONSE" column shows the number of returns and the return rate (in percent) for each program. A tabulation of the number of persons checking each subpart (1 through 5) of Question "A", and the percentage of the total survey response, for each program is shown in the next five columns. Some respondents checked more than one subpart of Question "A." Three combinations: 1 and 3, 1 and 2, and 2 and 3, were considered valid responses and are tabulated in Table 1. Any other combination of multiple responses was not considered as valid and was tabulated in the "other" column.

The grand totals (baccalaureate plus graduate degrees) for the number surveyed and the number responding in Table 1 are slightly less (27 and 34 respectively) than corresponding totals in Figures 1 and 3. There are two reasons for this: a few program codes could not be identified and for some listed programs there were zero responses.

Through use of data in Table 1 the percent of respondents entering the job market can be derived by combining those who found employment and those seeking employment. For example, of the total respondents for baccalaureate degree programs, 41.6 percent found employment (Item 2), another 0.3 percent were previously employed but found other employment (Items 1 and 2), 18.1 percent were seeking employment (Item 3) and another 2.2 percent were still seeking employment although they had other jobs (Items 1 and 3, Items 2 and 3). Therefore, 62.2 percent of all baccalaureate level respondents actively entered the job market following graduation.

TABLE 2: This table summarizes the annual salaries by program area for baccalaureate degree and graduate degree levels. The first column shows the number of responses; the second column gives the number and percent of total responses, which provided salary information. As noted above, only respondents who indicated that they were new entries in the Texas job market were considered. Although the exact salaries as reported were entered into the data base, Table 2 shows salaries by six selected ranges.

Numbers in the total response column for Table 2 for each program will correspond with the survey responses for like programs listed in Table 1. However, the totals will not correspond because Table 2 includes only those programs for which salary data was given.

TABLE 3: This table provides a breakdown of all reported salaries by average, high and low in each program for which salary data was reported. In addition, average salaries reported for directly, closely and generally related occupations are recorded.

TABLE 4: This table provides information concerning the relation between jobs taken and the program of study. Table 4 gives the number and percentage of jobs reported in each of the following categories: directly related, closely related, generally related and not related.

TABLE 5: This table tabulates the location of employment by program and degree level. Two areas, Houston and Dallas-Fort Worth, account for about 50 percent of all jobs reported by graduates. About 89 percent of all baccalaureate degree respondents and 82.4 percent of those with graduate degrees took jobs in Texas.

TABLE 6: This table lists the titles (U.S. Census Classification) of occupations reported as being directly, closely or generally related to the program area. The judgement as to whether the occupation was directly, closely or generally related was left entirely to the individuals responding to the survey. Consequently, these relationships are perceived differently by different individuals and it is not uncommon to have the same occupation listed in two or more categories.

APPENDICES

APPENDIX A - FORMAT DESCRIPTION FOR LIST OF GRADUATES

APPENDIX B - LETTER SENT TO GRADUATES BEING SURVEYED

FORMAT DESCRIPTION
SENIOR COLLEGE FOLLOW-UP OF MAY 1980 GRADUATES

These instructions outline a method of providing information to the Office of Postsecondary Educational Planning on May 1980 graduates that is compatible with the Coordinating Board's student records file. We do not want to ask your programming staff to submit the information in a format that would require extensive program revision. We will accept the student data in the format determined by your institution to be cost efficient. What is outlined below is simply an optimal format which would facilitate the processing of student data by this agency.

First, we would prefer that this information be submitted on magnetic tape. To be processable on the Coordinating Board's computer the following is the preferred tape format:

1) IBM 360-370 Compatible

2) 9 TRACK

3) Odd Parity

4) 800 or 1600 BPI

5) UNLABELED

6) 10 Records per block

Tapes will be returned as soon as processed. It is suggested that a gummed label indicating your institution and that the tape contains names and addresses of graduates be attached to the tape reel. This should assure that the tape will not be misplaced and will be returned without delay.

TAPE RECORD LAYOUT

Field No.	Name	Length	Content
1	FICE CODE	6	
2	MAJOR CODE	6	Coordinating Board Major Code

Coordinating Board

TEXAS COLLEGE AND UNIVERSITY SYSTEM
P.O. BOX 12788, CAPITOL STATION
AUSTIN, TEXAS 78711

June 3, 1980

Dear Graduate:

Our records indicate that you are a May graduate. Your school, along with nine others in the state, has been asked to participate in a survey which will poll approximately one-third of the senior college graduates in Texas. This survey is being conducted for the first time, and the results will assist us in providing counselors with better career information.

The information obtained from the survey will be used by this office in the revision of our report entitled "Postsecondary Educational Supply and Occupational Demand in Texas." This publication is distributed statewide free of charge to high school and college counselors, to libraries and other educational agencies. The information which you will provide will be CONFIDENTIAL; results will appear in composite form only. Please take a few minutes to return it to us no later than July 1, 1980.

Your time and participation in this survey will be greatly appreciated.

Sincerely,

John H. Cobb

John H. Cobb, Director
Postsecondary Educational Planning
